

# CRS-2000

## 2000W SINGLE OUTPUT DC/DC CONVERTERS

### GENERAL FEATURES:

Designed according to EN50155  
Fire and smoke: EN45545-2  
High input-output isolation  
Adjustable output voltage  
Remote inhibit  
Remote sensing  
Input & Output OK LEDs  
Output failure alarm  
Input reverse polarity protection  
ORing FET option  
Efficiency up to 93%

5 YEAR  
WARRANTY

Note: <sup>(1)</sup> Input voltage range for 100ms.

Several references are subjected to special MOQs and lead times. Please consult Premium's Sales Dept. and web site.

**INPUT**

Input voltage range	See table
Input undervoltage shutdown	55% to 60% Vi nom
Maximum allowed input ripple	5% Vin nom (EN50155:2021)
Maximum inrush current	< In max (Only for H option)

**OUTPUT**

Output voltage	See table
Output voltage adjustment:	
Vi min = 60% Vi nom	-10% ... +0% Vo nom
Vi min = 70% Vi nom	-10% ... +15% Vo nom
Line regulation (Io = nom)	< 0.2 %
Load regulation (Vin = nom, Io: 0...100%)	< 0.2 %
Ripple and noise (BW: 20MHz)	< 100 mVpp (Ta: -25°C ... 70°C) < 150 mVpp (Ta: -40°C ... -25°C)
Max. overvoltage protection	< 140% Vout nom
Max. overcurrent protection	105-110% Iout nom
Maximum remote sense	0.3V / pole

**ENVIRONMENTAL**

Storage temperature	-40°C ... 85°C
Operating temperature range Io: 100%	-40°C ... 55°C (OT1-2) <sup>(2)</sup>
Operating temperature range Io: 62.5%	-40°C ... 70°C (OT3-4) <sup>(2)</sup>
Cooling	Internal forced air controlled
Maximum Relative humidity	95% with no condensation
Shock and vibration	EN61373:2010 Category 1 class B body mounted with accessory NP-9282
MTBF	250.000h @ 40°C according to IEC61709:2017
Service life (at 40°C and 75% load)	20 years (fan maintenance after 10 years is required)

**EMC**

Emission according to	EN50121-3-2:2016, EN50121-4:2016, EN61000-6-4:2019 <sup>(3)</sup>
Immunity according to	EN50121-3-2:2016, EN50121-4:2016, EN61000-6-2:2019 <sup>(3)</sup>

**SAFETY**

Safety according to	EN62368-1:2020
Dielectric strength Input-Output	3000Vac, 4200Vdc 1min.
Dielectric strength Input-Earth	1500Vac, 2100Vdc 1min.
Dielectric strength Output-Earth	1500Vac, 2100Vdc 1min.
Fire and smoke	EN45545-2:2013

**MECHANICAL**

Approximate weight	<6kg
--------------------	------

**CONTROL**

Remote inhibit range	Logic: 1=OFF, Range: Vin
Alarm contacts	1A @ 24Vdc, 0.3A @ 150Vdc, 0.5A @ 125Vac
Local: Input OK, Output OK	Green LEDs

**PROTECTIONS**

Against overloads and short-circuits	Current limiting
Against output over-voltages	Self-recovery
Against over-temperature	Shutdown with self-recovery
Against reverse input voltage	Input fuse (Active protection with option H)
Against input under-voltage	Under-voltage lock-out
Against input over-voltage	Over-voltage lock-out
Against input over-currents	Input fuse

**Notes:**

<sup>(2)</sup> Below -25°C, handling the signals connector is not recommended.

<sup>(3)</sup> The emissions and immunity standard that the product meets depend on its part number (CRS-2000-69XXS-or-ZXX).

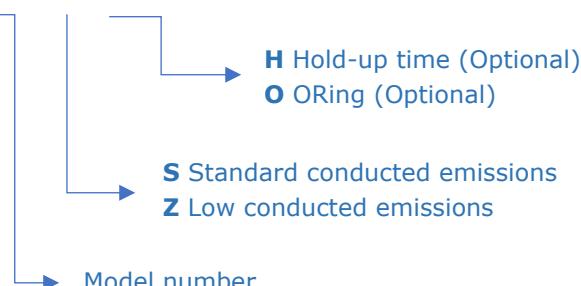

## ORDERING CODES

| 7 | Alarm relay NO (open when alarm)   |

## TYPICAL OUTPUT CHARACTERISTIC

## POWER DERATING vs AMBIENT TEMP.

## DESCRIPTION

The CRS-2000 series consists of DC-DC converters with galvanic isolation between input and output. The converters operate at a fixed switching frequency and use full-bridge converter topology.

For optimum regulation, remote sensing terminals must be connected on the load allowing to compensate for a voltage drop up to 0.3V on each cable.

A current limiting circuit protects the PSU against overloads and short-circuits.

The device is also protected against reverse polarity on input and the input fuse blows if an improper connection is made.

Under input undervoltage condition the PSU is disabled to prevent excessive discharge on the battery. Once the input is within the range the unit restarts automatically.

## START-UP

Cable connection should follow power and signal connection figures. Remote sensing is not mandatory, but if it is required, use of a co-axial or a twisted-pair cable is recommended.

**WARNING:** If the load is connected to the tabs of remote sensing (+/-S) and the connection from the output to this load is missing the remote sensing function could be made unusable due to the acting of the internal fuse protection.

If power levels close to the maximum are required, make sure the assembly enhances cooling by natural convection and the unit is placed in vertical position.

If several converters need to be paralleled, do as follows:

- Adjust output voltage of paralleled PSUs till they values match.
- Join the load outputs by using cables with a cross-section no greater than the one required and of equal length.
- Connect both output loads using cable with proper cross-section area and equal length.
- Do not use remote sensing.

For safety reasons, provide the equipment with a protective enclosure that complies with the electrical safety directives in effect within the country where the equipment is installed.

## INSTALLATION

It is possible to install the unit by means of the threaded holes on the bottom or using mounting brackets, see accessories section.

The inlet and outlet air must be free of elements that cause an airflow reduction (the minimum recommended distance to other objects is 50mm).

It is necessary to consider the environmental conditions of maximum temperature and altitude since they can limit the maximum output power.

See cabling recommendation below.

## LEDs

The CRS-2000 is equipped with 4 LEDs that light up when:

- **Vin pres.** → Control supply voltage OK
- **Vin OK** → 70% < Input voltage < 125% of nominal
- **Vout OK** → 90% < Output voltage < 115% of nominal
- **ORing OK** → ORing circuitry is active

## ALARMS

The alarm is activated when one of the following occurs:

- 70% > Input voltage > 125% of nominal voltage
- 90% > Output voltage > 115% of nominal voltage
- There is a defective fan → LED Vin OK blinks at 2Hz
- Internal temperature > 98°C → LED Vin OK blinks at ½Hz
- ORing circuitry fails → LED ORing OK blinks at 2Hz and output turns off

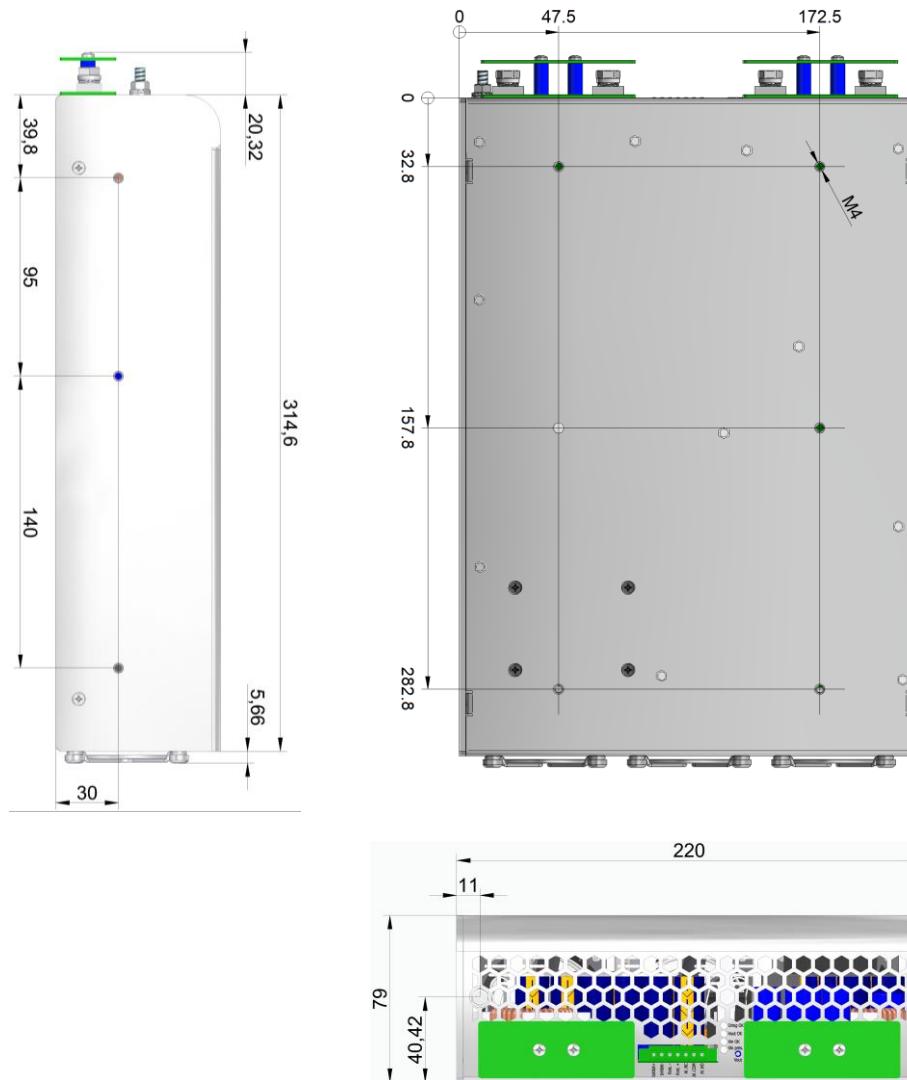

## CABLING RECOMMENDATIONS

	Input					Output			
	24 V	36 V	48 V	72 V	110 V	24 V	48 V	72 V	110 V
Maximum current	135 A	88.2 A	65.4 A	43.6 A	28.2 A	83.3 A	41.7 A	27.8 A	18.2 A
Cable cross-section	<b>50 mm<sup>2</sup></b>	<b>25 mm<sup>2</sup></b>	<b>16 mm<sup>2</sup></b>	<b>10 mm<sup>2</sup></b>	<b>6 mm<sup>2</sup></b>	<b>25 mm<sup>2</sup></b>	<b>10 mm<sup>2</sup></b>	<b>6 mm<sup>2</sup></b>	<b>4 mm<sup>2</sup></b>

## WORKING PARAMETERS

Input voltage parameters	24V	36V	48V	72V	110V
High input voltage instantaneous shutdown	34.1V	51.1V	68.2V	102.2V	156.2V
High input voltage timed shutdown ( $t > 100\text{ms}$ ) (Full load)	31.9V	47.9V	63.8V	95.8V	146.3V
Start-up voltage	18.5V	27.7V	37.0V	55.4V	84.7V
Low input voltage timed shutdown ( $t > 100\text{ms}$ ) (Full load)	16.1V	24.1V	32.2V	48.2V	73.7V
Low input voltage instantaneous shutdown	13.9V	20.9V	27.8V	41.8V	63.8V

## DIMENSIONS

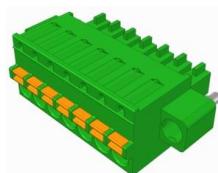

**Note:** All fixing holes are M4, maximum screw length inside the converter 4.5mm, maximum torque 0.6Nm.

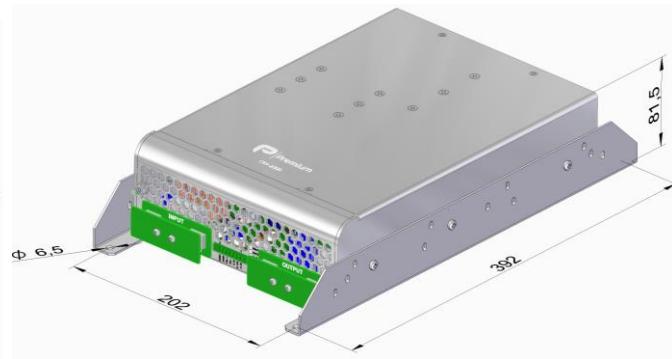

## ACCESSORIES

Description	Notes	CODE
Signals mating connector	Phoenix Contact FK-MCP 1,5/ 7-STF-3,81	2601-395
Mounting brackets kit	Contains two brackets and screws	NP-9282
6U Subrack mounting kit	Contains two brackets and screws	NP-9634

# CE|UKCA EU, UKCA DECLARATION OF CONFORMITY

The undersigned, representing the following:

Manufacturer: PREMIUM, S. A.,  
Address: C/ Dolors Aleu 19-21, 08908 L'Hospitalet de Llobregat, SPAIN

herewith declares that the product:

Type: DC/DC converter  
Models: **CRS-2000-6951 ... 6970**

is in conformity with the provisions of the following EU directives and UK legislation:

2014/35/EU SI 2016 No 1101	Low voltage / The electrical equipment (safety) regulations
2014/30/EU SI 2016 No 1091	EMC / Electromagnetic compatibility regulations
2011/65/EU Annex II and its amendment 2015/863/EU SI 2012 No. 3032	RoHS / Restriction of the use of certain hazardous substances in electrical and electronic equipment

and that standards and/or technical specifications referenced below have been applied:

EN 62368-1: 2020	Safety. Audio/video information and communication technology equipment
EN 61000-6-4: 2019	Generic emission standard
EN 61000-6-2: 2019	Generic immunity standard
EN 50155: 2021*	Railway applications. Electronic equipment used on rolling stock material
EN 50121-3-2: 2016* IEC 62236-3-2: 2018*	Railway applications. EMC Rolling stock equipment
EN 50121-4: 2016* IEC 62236-4: 2018*	Railway applications. EMC of the signalling and telecommunications apparatus

\* See annexe

CE marking year: **2021**; UKCA marking year: **2021**

#### Notes:

For the fulfillment of this declaration the product must be used only for the aim that has been conceived,  
considering the limitations established in the instructions manual or datasheet.

L'Hospitalet de Llobregat, 21-10-2021

Albert Sole  
Technical Director

**PREMIUM S.A.** is an ISO9001 and ISO14001  
certified company by **Bureau Veritas**
